Scientific Consultancy

Our portfolio of services provides solutions in each of the phases of a clinical research project, considering the regulatory aspects, monitoring, management and statistical analysis of data and giving support throughout the whole life cycle of the project.

AREAS OF EXPERTISE

Biometrics

We provide the best adapted solutions for the management and statistical analysis of the data.

Research funding

We offer advice and management of finance for your project.

Integral solutions

Expanding our knowledge to meet your needs, thanks to the versatility of our services.

Clinical monitoring

We guarantee the highest quality of data review and effective interaction with the centers participating in the study.

Regulatory aspects

We carry out all the regulatory procedures inherent to the project, including dealings with ethics committees, the Medicines Agency and any institutions involved in the study.

Project management

We will be present throughout the life cycle of the project, from the initial design to reaching the final results.

INDUSTRIES

We help our clients evaluate and connect with the resources they need to reach their goals. Whether it is support in the design and development of the project or support in the application and management of grants, we can adapt our experience to your specific needs, paying meticulous attention to all the key aspects.

Who we collaborate with:

- Institutions and research societies.
- Pharmaceutical and biotechnological industry.
- Health professionals and patient groups.
